Place- Pune

LinkedIn Profile- [linkedin.com/in/nikhilbafna](https://www.linkedin.com/in/nikhilbafna)

- **Objective:-**

Java Backend Developer with 8+ years of total experience and relevant experience in designing and developing enterprise applications using Java, Spring Boot, REST APIs, JPA, and SQL. Experienced in banking and financial services domains with exposure to client-facing development and production support. Recently expanded knowledge into Generative AI and workflow automation through AI Buildathon projects using n8n, developing AI-powered content generation and recruitment automation solutions.

- **Skills:-**

Java 8, Spring Boot, Spring Data JPA, REST APIs, JDBC, Maven, Gradle, Junit, MySQL, Oracle, HTML, CSS, Javascript.

AI & Automation

Generative AI, Prompt Engineering, n8n Workflow Automation, AI Content Generation, LLM Integration Concepts.

Resume Screening & Scoring Systems and AI-Assisted Process Automation

- **Work Experience:-**

Project 1: LinkedIn Content Generator

AI-Powered LinkedIn Content Generator | ProductSpace AI Buildathon 2026

- Designed and implemented an AI-powered LinkedIn content generation platform using n8n workflows.
 - Automated content creation based on user-provided topics and professional domains.
 - Integrated LLM-based prompts to generate structured and engaging posts.
 - Reduced manual effort required for professional content creation.
-

Project 2: AI-Powered HR Recruitment System

AI Recruitment & Resume Scoring Platform | ProductSpace AI Buildathon 2026

- Developed an AI-driven recruitment system to evaluate candidate resumes against job requirements.
- Automated resume analysis and candidate scoring based on skills, experience, and role suitability.
- Generated ranking reports to assist recruiters in candidate shortlisting.
- Implemented workflow automation for screening and evaluation processes.
- Improved consistency and efficiency of the recruitment review process.

➔ **HCL Technologies Private Limited (Jun 2022 – Jun 2024):-**

I worked for various clients like John Deere and Nordea Bank.

Responsibilities:-

- Understanding the requirements (technical, functional and operational).
- Worked on understanding and development of code according to requirement for MTP project in John Deere, produced REST API using spring boot and consumed them.
- Worked on Frontend part of development in Nordea Bank using Ext.js

- Worked on understanding and development of the Technical Requirement.

→ **Capgemini Technologies Pvt. Ltd.(Apr 2020 – May 2022):-**

In HSBC Bank project, NEST is a credit card decisioning system, where we use different cards feed from input mainframe systems and process the feed at the BO (Batch Orchestration) application which is then sent to SAS ID for intelligent strategy based decision making for customers who are potentially vulnerable with respect to cards and non cards systems. The PVC (Potential Vulnerable Customers) are processed further to offer management (COMB) for further offer generation via SAS ID.

Responsibilities:-

- Understanding the requirements (technical, functional and operational).
- Worked on development of the Technical Requirement.
- Working with clients based in London for understanding the requirement and development.
- Working with the other member of the team and other teams (TRIAD, POWERCURVE, etc.) as well for requirement analysis and technical analysis.

→ **mPhatek Systems Pvt. Ltd.(Nov 2019 – March 2020):-**

SBI is a project in which we created the verification of PAN, Voter ID and phone number consuming 3rd party API's. Also we provided adashboard for easy representation of the data.

Responsibilities:-

- Understanding the requirements.
- Worked on development of the SBI Requirement.
- Worked on Consumption of spring JPA API.
- Working with the other member of the team.

→ **Beauto Systems Pvt Ltd.(Feb 2019 – May 2019):-**

Worked as java developer for one of the use case for a south Africa based Client.

→ **1to1 Help Pvt. Ltd.(Jul 2018- Jan 2019):-**

1to1help is a project in which we create the website of the company.

Responsibilities:-

- Understanding the requirements.
- Worked on development of the website.
- Worked on creation of Spring JPA API.
- Working with the other member of the team.

→ **Syntel Pvt. Ltd.(Nov 2013- Feb 2017):-**

Syntbots is a project in which we conduct automation of the application like ticket generation, etc. In this use case, we have automatedthe process of fetching the data from the database and inserting in the excel sheet. Also as part of the use case, we are fetching data from the database and inserting it in an .csv file which is later to be inserted into COGNOS Report database by using simple JDBC Queries.

Responsibilities:-

- Understanding the requirements.
 - Worked on development of the assigned code.
 - Worked on Building the code.
-

- **Educational Qualifications:-**

Graduated in Computer Engineering (B.E.) in 2013 with First Class (62.2%) and Aggregate all Semesters (57.2%) from Pune University (AISSMS IOIT College - Pune, India)

H.S.C (Science) passed in 2008 with First Class (72.5%) from Maharashtra Board (S.V Union Junior College - Pune, India).

S.S.C passed in 2006 with Distinction (76.6%) from Maharashtra Board (Sinhgad City School - Pune, India).

Achievement Section

ProductSpace AI Buildathon 2026

- Participated in AI Buildathon focused on Generative AI and workflow automation.
- Developed AI-powered LinkedIn Content Generator and HR Recruitment Scoring System using n8n-based workflows and LLM integrations.

- **Trainings Undergone & Certifications Acquired:-**

Oracle Certified Associate, Java SE 7 Programmer.

Product Space – AI Buildathon participation 2026.
